- 100% recyclable
- Fire retardant to Class B2 of new European Fire Regulations. (UL94-V2)
- Safe working load, static 150 tons per m² (500 tons per m² on double profile)
Sports Hall Protection

Make better use of your facility by maximising all your opportunities without damaging your existing floor. At EFS we have the ideal solution and have provided it to many UK venues including: Bolton Arena, Leeds Met University, Loughborough University and Nottingham University.

Ice Sheild

Specifically designed and manufactured for indoor and outdoor ice rinks, Ice Shield™ provides the ideal opportunity for converting your rink into a true multipurpose venue for concerts, trade shows, and other special events.

How do we do it?

EFS's Club Carpet, is easy to lay and remove. The carpet can be supplied in a bespoke colour and size specifically for the dimensions and layout of the venue.

Club Carpet is simple to up-lift and store, and any venue can be transformed many times adding significant income to the client – without the need to invest in expensive temporary marquees and with no damage to the sports floor.

The strength and durability of the carpet means the client is able host professional, safe and profitable events over many years.

Tech Specs

- Typically less than 2 hours to install
- Fully certificated non-slip surface – tested in accordance with BS7976: Part 2
- Guaranteed for 5 years – available in any colour
- Panel sizes 2m x 1m (27kg per panel) – tested to 150 tonnes per m²
- No need to resurface the ice before or after use as Ice Shield™ will not damage the ice
- No need to resurface the ice before or after use as Ice Shield™ will not damage the ice
- System is fire rated B1 in accordance with BS 476: Part 6:1989
